

Practical 1.1

AIM: Introduction to web 3.0, website, web portal, domain name, networking concepts. Introduction to internet, hosting of website, server configurations and maintenance.

1. Introduction to Web 3.0

Web 3.0 is the third generation of the World Wide Web. It focuses on decentralization, artificial intelligence (AI), blockchain technology, and semantic data, allowing users to have greater control over their information.

Features of Web 3.0

- Decentralized applications (DApps)
- Blockchain technology
- Artificial Intelligence (AI)
- Semantic Web (machines understand data)
- Better privacy and security
- Faster and smarter search results

Advantages

- Improved data security
 - User ownership of data
 - Transparent transactions
 - Personalized user experience
-

2. Website

A **website** is a collection of interconnected web pages stored on a web server and accessed using the Internet through a web browser.

Types of Websites

- Static Website
- Dynamic Website
- E-commerce Website
- Educational Website
- Business Website
- Personal Website

Components of a Website

- Home Page
- Web Pages
- Navigation Menu
- Images and Videos
- Contact Form

Examples

- Google
 - Wikipedia
 - Amazon
-

3. Web Portal

A **web portal** is a special website that provides users with personalized access to various services and information after login.

Features

- User authentication
- Personalized dashboard
- Multiple services in one place
- Secure access

Examples

- Student Portal
- Employee Portal
- Government Portal
- Banking Portal

Difference between Website and Web Portal

Website	Web Portal
Open to everyone	Usually requires login
General information	Personalized information
Static or dynamic	Mostly dynamic
Public access	Restricted access

4. Domain Name

A **domain name** is the unique address of a website on the Internet.

Example:

- www.google.com
- www.amazon.in
- www.wikipedia.org

Parts of a Domain Name

- **Protocol:** https://
- **Subdomain:** www
- **Domain Name:** google
- **Extension (TLD):** .com

Types of Domain Extensions

- .com (Commercial)
 - .org (Organization)
 - .edu (Education)
 - .gov (Government)
 - .net (Network)
 - .in (India)
-

5. Networking Concepts

A **computer network** is a group of computers connected to share data and resources.

Types of Networks

LAN (Local Area Network)

- Covers a small area
- Example: School or Office

MAN (Metropolitan Area Network)

- Covers a city

WAN (Wide Area Network)

- Covers countries or the world

- Example: Internet

Network Devices

- Router
- Switch
- Hub
- Modem
- Access Point

Network Topologies

- Bus
- Star
- Ring
- Mesh

Network Protocols

- TCP/IP
 - HTTP
 - HTTPS
 - FTP
 - SMTP
 - DNS
-

6. Introduction to Internet

The **Internet** is a worldwide network of interconnected computers that allows users to communicate and share information.

Services of the Internet

- Email
- Web Browsing
- Video Calling
- Online Banking
- Social Media
- Cloud Storage
- E-commerce

Advantages

- Fast communication

- Information sharing
- Online education
- Business opportunities
- Entertainment

Disadvantages

- Cybercrime
 - Privacy issues
 - Fake news
 - Internet addiction
-

7. Website Hosting

Website hosting is the service that stores website files on a server so they can be accessed through the Internet.

Types of Hosting

1. Shared Hosting
2. VPS Hosting
3. Dedicated Hosting
4. Cloud Hosting
5. Managed Hosting

Hosting Requirements

- Domain Name
 - Web Server
 - Database
 - Storage
 - Bandwidth
 - SSL Certificate
-

8. Server Configuration

A **server** is a computer that provides services and resources to other computers (clients).

Basic Server Configuration

- Install Operating System (Linux/Windows Server)

- Configure Web Server (Apache/Nginx/IIS)
- Install Database (MySQL/PostgreSQL)
- Configure DNS
- Install SSL Certificate
- Set User Permissions
- Configure Firewall
- Create Website Directory

Common Web Servers

- Apache
 - Nginx
 - Microsoft IIS
-

9. Server Maintenance

Server maintenance ensures that the server remains secure, reliable, and performs efficiently.

Maintenance Activities

- Regular software updates
- Security patch installation
- Backup website and database
- Monitor server performance
- Check disk space
- Scan for malware
- Monitor server logs
- Restart services when required

Best Practices

- Use strong passwords
- Enable HTTPS
- Install antivirus software
- Schedule automatic backups
- Monitor uptime
- Remove unused files and applications

Practical-1.2

AIM: Create a website layout using table structure which consist of space/locations for Logo,Search,News,Events, Content area, etc.

Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Simple Website Layout</title>
</head>
<body>

<table border="1" width="100%">

  <tr>
    <td>Logo</td>
    <td>Search</td>
  </tr>

  <tr>
    <td>News</td>
    <td>Content Area</td>
  </tr>

  <tr>
    <td>Events</td>
    <td>Contact Us</td>
  </tr>

</table>

</body>
</html>
```

Output:

LOGO	My Website	Search Search
Home About Services Gallery Contact		
News • Latest News 1 • Latest News 2 • Latest News 3	Content Area This is the main content section of the website. You can display text, images, videos, and other information here.	Events • Event 1 • Event 2 • Event 3
© 2026 My Website. All Rights Reserved.		

Practical 1.3

AIM: Make resume with the help of Basic HTML Tags

Code:

```
<!DOCTYPE html>
<html>
<head>
    <title>Resume</title>
</head>
<body>

<h1 align="center">RESUME</h1>

<table border="1" width="100%" cellpadding="10">

<tr>
    <!-- Left Section -->
    <td width="30%" valign="top">
        <h3>Personal Details</h3>
        <p><b>Name:</b> kashish baviskar</p>
        <p><b>Email:</b> kashish@email.com</p>
        <p><b>Phone:</b> 9876543210</p>
        <p><b>Address:</b> Ahmedabad</p>

        <h3>Skills</h3>
        <ul>
            <li>HTML</li>
            <li>CSS</li>
            <li>MS Office</li>
        </ul>
    </td>

    <!-- Right Section -->
    <td width="70%" valign="top">
        <h3>Career Objective</h3>
        <p>To work in a challenging environment where I can improve my
skills.</p>

        <h3>Education</h3>
```

```
<ul>
  <li>B.tech - Indus university</li>
  <li>12th - Sarsawati vidhya mandir</li>
  <li>10th - Arpan International School</li>
</ul>

<h3>Hobbies</h3>
<ul>
  <li>Reading</li>
  <li>writing</li>
</ul>
</td>
</tr>

</table>

</body>
</html>
```

Output:**RESUME**

Personal Details Name: kashish baviskar Email: kashish@email.com Phone: 9876543210 Address: Ahmedabad Skills • HTML • CSS • MS Office	Career Objective To work in a challenging environment where I can improve my skills. Education • B.tech - Indus university • 12th - Sarsawati vidhya mandir • 10th - Arpan International School Hobbies • Reading • writing
--	--

Practical 1.4

AIM: Write HTML Code to display student registration form.

Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Student Registration Form</title>
</head>
<body>

<h2 align="center">Student Registration Form</h2>

<form>

Name:
<input type="text"><br><br>

Father's Name:
<input type="text"><br><br>

Email:
<input type="email"><br><br>

Password:
<input type="password"><br><br>

Gender:
<input type="radio" name="gender"> Male
<input type="radio" name="gender"> Female<br><br>

Course:
<select>
```

```
<option>BCA</option>
<option>BBA</option>
<option>B.Com</option>
<option>B.Sc</option>
</select><br><br>
```

Hobbies:

```
<input type="checkbox"> Reading
<input type="checkbox"> Sports
<input type="checkbox"> Music<br><br>
```

Address:

```
<textarea rows="4" cols="30"></textarea><br><br>
```

```
<input type="submit" value="Register">
<input type="reset" value="Reset">
```

```
</form>
```

```
</body>
```

```
</html>
```

Output:

Student Registration Form

Name:

Father's Name:

Email:

Password:

Gender: ☐ Male ☐ Female

Course:

Hobbies: ☐ Reading ☐ Sports ☐ Music

Address:

Practical 2.1

AIM: Use CSS in the resume which was made using only HTML tags.

Code:

```
<!DOCTYPE html>
<html>
<head>
  <title>Resume</title>

  <style>
    body{
      font-family: Arial;
      background-color: #f2f2f2;
    }

    table{
      width: 80%;
      margin: auto;
      border-collapse: collapse;
      background: white;
    }

    td{
      border: 1px solid black;
      padding: 10px;
    }

    h1{
      text-align: center;
      color: blue;
    }

    h3{
      color: darkgreen;
    }

    ul{
      padding-left: 20px;
    }
```

```
</style>

</head>

<body>

<h1>RESUME</h1>

<table>

<tr>
  <td width="30%">
    <h3>Personal Details</h3>
    <p><b>Name:</b> Kashish baviskar</p>
    <p><b>Email:</b> kashish@email.com</p>
    <p><b>Phone:</b> 9876543210</p>
    <p><b>Address:</b> Ahmedabad</p>

    <h3>Skills</h3>
    <ul>
      <li>HTML</li>
      <li>CSS</li>
      <li>MS Office</li>
    </ul>
  </td>

  <td width="70%">
    <h3>Career Objective</h3>
    <p>To work in a reputed company and improve my skills.</p>

    <h3>Education</h3>
    <ul>
      <li>B.tech - Indus university</li>
      <li>10th - Sarsawati vidhya mandir</li>
      <li>12th - Arpan international school</li>
    </ul>

    <h3>Hobbies</h3>
    <ul>
      <li>Reading</li>
      <li>writing</li>
    </ul>
  </td>
</tr>
</table>
```

```
</tr>
```

```
</table>
```

```
</body>
```

```
</html>
```

Output:

RESUME	
Personal Details Name: Kashish baviskar Email: kashish@email.com Phone: 9876543210 Address: Ahmedabad Skills • HTML • CSS • MS Office	Career Objective To work in a reputed company and improve my skills. Education • B.tech - Indus university • 10th - Sarsawati vidhya mandir • 12th - Arpan international school Hobbies • Reading • writing

Practical-2.2

Aim: Write the following styles in a separate CSS file and also show how to link this CSS file in an HTML file.

A. The headings should have normal font style and font size should be 120%.

B. Apply a background image "abcd.jpg".

C. Write a paragraph about it and define a class Arial for paragraph which defines font family.

Code:

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>CSS Example</title>

  <link rel="stylesheet" type="text/css" href="style.css">

</head>
<body>

  <h1 style = "color:white">My Website</h1>

  <h2 style ="color : white ">About Background Images</h2>

  <p class="Arial" style = "color:white">
    A background image can be used to make a webpage more attractive.
    CSS allows us to apply an image as the background of a webpage.
    In this example, the image named abcd.jpg is used as the background image.
  </p>

</body>
</html>
```

Code (CSS) :

h1, h2, h3, h4, h5, h6

```
{  
    font-style: normal;  
    font-size: 120%;  
}
```

body

```
{  
    background-image: url("abcd.png");  
    background-size: cover;  
}
```

.Arial

```
{  
    font-family: Arial;  
}
```

Output :
